

## BRAVE NEW WORLD

DuVersity Event October 25-28 Nashville, Tennessee

The seminar is being put together to help us to face the fearing of the future. It will not provide, however, any solutions or answers! Thinking in terms of problems and solutions is archaic and only makes matters worse. We will be addressing alternative ways of thinking and feeling; imagining and experimenting, expressing and acting. What religion and science might mean in the 21st century is rapidly changing. There are emergent processes for which we have no words as yet and barely glimpse. Here are some of the components of the event, which will be woven together as closely as we can.

- Human history, known and unknown
- Higher intelligence and the role of drama and literature over history
- Shakespeare's Providence and his hidden worlds
- Grasping the world situation: 'All and Everything', Gurdjieff's example.
- Ending of hierarchy and causality, dialogue, self-organisation and beyond.
- Biospheres 1, 2 and 3 a new kind of science.
- Prophecy and dreaming: the social dreaming matrix.
- Understanding the psychology of negativity.
- Brave New World: the Synergic Epoch of John Bennett.
- New technology and science: techgnosis and artificial intelligence, transhumanism and the 'alien'.

Fuller descriptions of these components will appear later. The event will be flavoured with drama, music and dance. This is specifically to enable active assimilation of inputs and experiences. Go to <https://www.duversity.org/bravenewworld> for practical details
